

SpeedAkin™

Anatomic Compression Implant

Anatomic. Flush. Efficient.

TREACE®
A Step Ahead.™

SpeedAkin™

Anatomic Compression Implant

- **Anatomic Design**

Implant curvature follows the natural shape of the hallux to reduce prominence

- **Flush Insertion**

System allows application flush to bone during insertion to reduce the need for tamping

- **Efficient Workflow**

Dynamic compression through a streamlined and simple workflow

Ordering Information

SK63 SpeedAkin™ 9x9mm Anatomic Compression Implant

Before use of the system, the surgeon should refer to the appropriate instructions for use and surgical technique for complete warnings, precautions, indications, contraindications, and adverse events. Risks include, but are not limited to: infection, pain, discomfort from the presence of the implant, loosening of the implant, and loss of correction with nonunion or malunion. If any of these occur, additional treatments may be needed. Additional information about risks, warnings, and instructions is available at treace.com/labeling/
