HyperPlate™ XM

Dynamic Compression Locking Implant

SpeedPlate®
Compression and Speed.

FastPitch®
Strength and Stability.

One Powerful Construct.

Anatomically designed for fixation in the midfoot & hindfoot.

TREACE®

HyperPlate™ XM

Dynamic Compression Locking Implant

Versatile Anatomic Design

Ultra-low profile implant featuring multiple sizes to accommodate TN, CC, Evans, NC, and TMT applications

Dynamic Compression With Rapid Insertion

Engineered to provide continuous compression across the fusion site, in a streamlined technique

Powerful Stability

Titanium "X" shaped HyperPlate™ Technology combines SpeedPlate® with FastPitch® multiplanar locking fixation for enhanced construct strength and stability

SK72	HyperPlate™ **XM** Rapid Compression Implant - Large 23mm
SD31	FastPitch® Locking Screw Pack - 12, 14, 16mm

Before use of the system, the surgeon should refer to the appropriate instructions for use and surgical technique for complete warnings, precautions, indications, contraindications, and adverse events. Risks include, but are not limited to: infection, pain, discomfort from the presence of the implant, loosening of the implant, and loss of correction with nonunion or malunion. If any of these occur, additional treatments may be needed. Additional information about risks, warnings, and instructions is available at Lapiplasty.com/surgeons/labeling.
